Start your day with 6 servings!

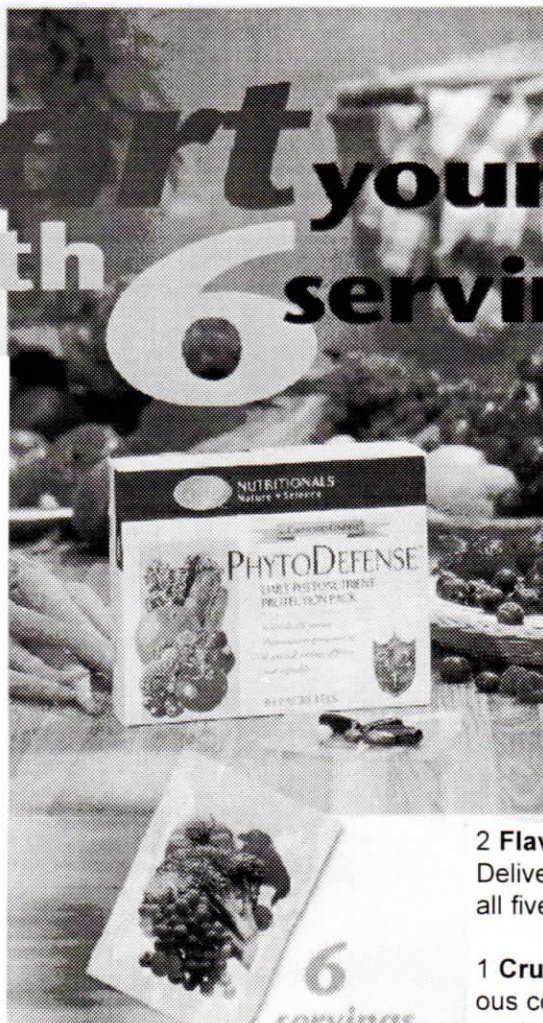

Whole fruits and vegetables are packed with powerful compounds called phytonutrients: health-promoting nutrients that can protect your cells against damage, disease and infection. Studies show that phytonutrients can help reduce your risk of developing life-threatening illnesses like cancer and heart disease. When you eat fruits and vegetables, you unlock their protective power!

Do you eat enough?

Add up how many fruits and vegetables you ate yesterday. Chances are, you can count how many you've eaten over the last 2 days on one hand! For optimal protection, the National Cancer Institute suggests eating 9 servings of fruits and vegetables every day. If you're one of the 92% of people who fall short, you aren't getting enough protection. Your health could be at risk!

GNLD gives you 6!

GNLD's revolutionary PhytoDefense delivers 6 optimal servings of the phytonutrients in 25 different fruits and vegetables. GNLD makes getting your daily requirement simple: Just enjoy at

TO GO!

*Boost your defenses
with PhytoDefense —
exclusively from GNLD!*

*Make a positive difference
in people's lives*

least 3 fruits and vegetables a day and take your PhytoDefense for 6 more optima servings. It's that easy!
No product on the market protects you better!

The PhytoDefense targeted "countdown" to a healthy body:

3 Carotenoid Complex™
Proven in USDA studies to strengthen immune defenses and reduce oxidative damage.

2 Flavonoid Complex™
Delivers the health-protection benefits of all five classes of flavonoids.

1 Cruciferous Plus™ Provides cruciferous compounds shown to help protect against breast and prostate cancers, and lower cholesterol.

- I'm interested in learning more about GNLD line of nutritional products
- I'd like more information about how I can start my own business offering GNLD products.
