INTRODUCTION:

This is one of the standard print-outs of the Family Tree Maker Genealogical Software.

The Introduction and Index are edited in.

These names are the bloodline from the arbitrary Banogon ROOT.

The print-out is generated from data as encoded into the Database from the various sources over the years. The early data came from the memory banks of Lisa “Badingding” Señeris-Gil, and the immediate cousins, the offspring of Pio Calumpang Banogon. A number of interviews with Tia Cresing Banogon-Rabaya yielded more data on the early Banogon forbears. Some definitive data of the Calumpang connection has been contributed by Ron Jacob Calumpang from his research. A recent hardcopy by Joselito Banogon Flores yielded more data on the Marcelo Banogon branches. Another Banogon, Giancarlo, emailed a number of additional members of the Vernon Banogon branch. And the great-grandchildren of Pedro Banogon, Karen Orbeta-Mira and Lillian Montagnino-Aaronson recently contributed much more data on their branches. Most recently, Elena Banogon-Dequito sent data on the branch of Higino Banogon.

All these names were merged into the database which had many of the family branches shown in the listing above, many of which were from volunteered family tree printouts, interviews, internet research, and the like.

The Database is a project to trace the inter-relational linkages between major families in the Tanjay area, by bloodline or marriage.

Data may not be very accurate, as much of it, especially those of the older generations, are taken

from the younger folk. Furthermore, in an effort to converge as many with the same family name to a common root, liberal assumptions have been made. Until such time that more definitive information can be dug up (such as from the church or municipal records), we have to contend with what is presented here.

Unique in this database is that each individual has been assigned a birth year, which is an educated guess based on date interpolation using assumptions of sibling spacing, and child-bearing years. Such dates are prefixed by “about”. Where an exact date is known, the birth years of the siblings, parents and children are adjusted accordingly. Still, many of the dates may be significantly off, since the order of births of siblings may be inaccurate, and/or incomplete.

The format of the print-out is as follows:

1. Arabic numeral prefix to each name is a unique number for each individual.
2. Names with a hash # prefix means that the name will appear again in later generations, in reference to their children.
3. Roman numeral prefix is the order of birth for siblings.
4. Small superscripted numbers indicate generational level of individuals.
5. Parenthetized names after emboldened name are forebears or bloodline of individual.
6. All years shown are estimated date of births (DOB) when prefixed by Abt (about).
7. Where full names are unknown, XXX are used, or descriptive titles such as “AnoyPa”, who would be the father of the known “Anoy”.

We enjoin the clan members to make corrections/updates as may deem fit, such as filling in the correct names, DOBs, additional children and/or siblings, preferred deletions, etc. If sent back to <ferngil@aol.com>, we will update the database and reissue a new printout.

Next portion is the index which lists all the members alphabetically, and their corresponding reference number.

Last three pages shows the ancestry of the younger members of the clan with the widest known ancestry.
