

**GIL FAMILY TREE**  
Version 3 – 21 July 2016  
of Pangasinan, Philippines

INTRODUCTION:

This is one of the standard print-outs of the Family Tree Maker Genealogical Software.

The Introduction and Index were edited in.

The print-out is generated from data as encoded into a genealogical database from the information taken from the Wordstar files of the Gil Family Tree, first researched and collated by Generoso Gil starting from the 1970s, and updated by other clan members after posting on the internet by Danny Gil sometime in 2000.

The format of the print-out is as follows:

1. Arabic numeral prefix to each name is a unique number for each individual.
2. Names with a hash # prefix means that the name will appear again in later generations, in reference to their children.
3. Roman numeral prefix is the order of birth for siblings.
4. Small superscripted numbers indicate generational level of individuals.
5. Parenthesized names after emboldened name are forebears or bloodline of individual.
6. All years shown are estimated date of births (DOB) when prefixed by Abt (about).
7. Where full names are unknown, XXX are used or descriptive names such as FelipePa..

We enjoin the clan members to make corrections/updates as may deem fit, such as filling in the correct names, birth and death years, additional children and/or siblings, preferred deletions, etc. If sent back to <[ferngil@aol.com](mailto:ferngil@aol.com)>, we will update the database and reissue a new printout.

Last portion is the index which lists all the members arranged alphabetically, and their corresponding unique ID number.

Newer editions of the family tree are posted periodically on the internet on the link below.

It is also posted as a Genealogical Project in the interactive mode, with various view formats.
