

# GUERRERO FAMILY TREE

Version 1 – 1 August 2017

Bais / Tanjay, Neg Or, Philippines

## INTRODUCTION:

This is one of the standard print-outs of the Family Tree Maker Genealogical Software.

The Introduction and Index were edited in.

The print-out is generated from data as encoded into a genealogical database mainly from the information volunteered by Balbino Guerrero, who traces his roots to Ilocos Norte. The database contains hundreds of family trees collated over the years from various sources. One of the larger trees are the Ravals, one of whom married a Victorino Guerrero from Badoc. One of their sons Hilarion, came back from Hawaii, and settled as chief mechanic in the Mendieta Hacienda in Tanjay, and begat the Guerrero branch in the area.

Unique in this database is that each individual has been assigned a birth year, which is an educated guess based on date interpolation using assumptions of sibling spacing, and child-bearing years. Such dates are prefixed by the word "about". Where an exact date is known, the birth years of the siblings, parents, children and spouses are adjusted accordingly. Still, many of the dates may be significantly off, since the order of births of siblings may be inaccurate, and/or siblings are incomplete.

The format of the print-out is as follows:

1. Arabic numeral prefix to each name is a unique number for each individual.
2. Names with a hashtag # prefix means that the name will appear again in later generations, in reference to their children.
3. Roman numeral prefix is the order of birth for siblings.
4. Small superscripted numbers indicate generational level of individuals.
5. Parenthetized names after emboldened name are forebears or bloodline of individual.

We enjoin the clan members to make corrections/updates as may deem fit, such as filling in the correct names, birth and death years, additional children and/or siblings, preferred deletions, etc. If sent back to <[ferngil@aol.com](mailto:ferngil@aol.com)>, we will update the database and reissue a new printout.

Last portion is the index which lists all the members arranged alphabetically, and their corresponding unique ID number.

This listing shows the known off spring or bloodline of Victorino "Toring" Guerrero. However within the database, there are other sets of Guerreros who belong to other branches that are not on the bloodline of Victorino. By themselves, they also form separate family trees.

So it is best to explore the database in a broader view by clicking on the link below that brings you to a Descendants View on the interactive Tribal Pages site. Click on Home to read the Intro, and the rationale.
