

# LASOLA FAMILY TREE

Originally of Dumaguete

Version 3 – 13 Oct 2015

## INTRODUCTION:

This is one of the standard print-outs of the Family Tree Maker Genealogical Software.

The print-out is generated from a name listing as encoded into the “Genealogical Project” database gathered from various sources over the years. This is a project to trace the inter-relational linkages between various families by bloodline or marriage.

Majority of the data comes from the Lasola / Malay / Manlapaz Family Tree files of Enrique Cariño, and the inputs from the Cariño clan.

Unique in the database is that all individuals are shown with a birth year. Most are interpolations, based on guideposts of known birth years, and are prefixed by Abt (about). These dates are necessary in a large database where new entries are more easily cross checked for duplication with existing data. It must be noted that many of the birth years may be significantly off, since the order of births of siblings may be inaccurate, and/or incomplete.

The format of the print-out is as follows:

1. Arabic numeral prefix to each name is a unique number for each individual.
2. Names with a hash # prefix means that the name will appear again in later generations, in reference to their children.
3. Roman numeral prefix is the order of birth for siblings.
4. Small superscripted numbers indicate generational level of individuals.
5. Parenthesized names after emboldened name are forebears or bloodline of individual.
6. All years shown are estimated birth and/or death years when prefixed by Abt (about).
7. Where full names are unknown, XXX are used, or other descriptive titles.

Last portion is an Index with all alphabetized names and their reference numbers.

We enjoin the clan members to make corrections/updates as may deem fit, such as filling in the correct names, years, additional children and/or siblings, preferred deletions, etc. If sent back to <[ferngil@aol.com](mailto:ferngil@aol.com)>, we will update the database and reissue a new printout.
