

VALENZUELA FAMILY TREE

Originally of Polo, Bulacan, Philippines

Version 5 - 10 July 2014

INTRODUCTION:

This is one of the standard print-outs of the Family Tree Maker Genealogical Software.

The Introduction and Index is edited in.

The print-out is generated from data as encoded into the Genealogical Project Database, built up from various sources over the years. The project aims to trace the inter-relational linkages between selected families. Internet link below is for the Valenzuela Tree.

<http://tanjaygenealogicaldatabase.tribalpages.com/family-tree/tanjaygenealogicaldatabase/23402/22544.1/Valenzuela-ROOT-Descendants>

Within that database are over 130 Family Trees, with about 33,000 individuals. This is a public service of the Tanjay Association of USA. Other selected detailed family trees can be seen at:

<http://tanjaycity.org/familytrees/famtrees.html>

This printout focuses only on the VALENZUELA FAMILY Tree.

Majority of the data in this Family Tree was supplied in a series of electronic files provided by Charito "Sari" Valenzuela, as she had requested assistance in building up their family tree.

Since then, numerous Valenzuela kin have sent in updates and corrections. These are immediately posted on the Tribal Pages site above, However, these updates are not reflected in this printout until the next edition or version is released.

This present version has 434 individuals on the bloodline and 165 spouses or partners.

In this database, each individual is defined by at least a first name and family name (nicknames are with quotation marks, and married females are shown with their maiden names), and a birth year. Where the exact the birth year is unknown, the data is "guestimated" by date interpolation, based on logical assumptions on child spacing, typical marriage age, and child-bearing ages.

The format of the print-out is as follows:

1. Arabic numeral prefix to each name is a unique number for each individual.
2. Names with a plus + prefix means that the name will appear again in later generations, in reference to their children.
3. Roman numeral prefix is the order of birth for siblings.
4. Small superscripted numbers indicate generational level of individuals.

5. Parenthesized names after emboldened name are forebears or bloodline of individual.
6. All years shown are estimated date of births (DOB) when prefixed by “about”.
7. Where full names are unknown, XXX or YYY are used, or other descriptive titles.

We enjoin the clan members to make corrections/updates as may deem fit, such as filling in the correct names, DOBs, additional children and/or siblings, preferred deletions, etc. If sent back to <ferngil@aol.com>, we will update the database and reissue a new printout.

Last portion is the index.
