Subject: Re: [UpscaLoop] Fw: the math of alleged cheating

Bert, what I saw on FB was a snap shot of such a tabulation that showed Escudero's count going down with each new count lower than the previous. I will try to retrieve that image and send to you, but in all fairness, FB postings are rife with strong opinions from all sorts of characters who could doctor things.

However, all this Smartmatic/PCOS/Comelec fracas is not new. In the last election, there were those 60/30/10% discussions where all the winning candidates everywhere followed 60% for the administration, 30% for the opposition and 10% for the independents. Statistically impossible. Comelec head Brillantes was in the center of it all, though he has retired allegedly a very rich man. Now the present guy is Bautista.

Cheers to all.  
Danny

Danny, when you say Escudero's count started going down, did you mean the following count is lower than the previous count, or simply the increase was not as fast as the other two?

Bert P

Here is the snapshot lifted off FB. Lower count was on 4:40 AM May 10. Upper count was on 5:30 AM May 10. Num 1 is Robredo, 2 is Marcos, 3 is Cayetano, 4 is Escudero. From the beginning, this order has been seesawing. Amazing how Escudero's vote went down. Negative votes? I don't know any of those people exchanging comments.

The image shows a screenshot of a Facebook post. On the left, there are two election count graphics for the Vice President race. The top graphic is titled "VICE PRESIDENT" and "DAPAT TAMIA!" with a timestamp of "5:30 AM, MAY 10, 2016". It lists four candidates: 1. 13,050,115; 2. 13,000,419; 3. 5,349,398; 4. 4,449,038. The bottom graphic is titled "VICE PRESIDENT" and "DAPAT TAMIA!" with a timestamp of "4:40 AM, MAY 10, 2016". It lists the same four candidates: 1. 12,993,399; 2. 12,964,994; 3. 5,329,047; 4. 4,479,913. Red circles highlight the counts for candidate 4 in both graphics. Below the graphics is a comment: "Comelec???? What the hell is this? Explain comelec???" with 616 reactions and 73 comments. On the right, the Facebook post content is visible. The user is Ferdinand Alcos, who posted the image. The post text says: "Blatant cheating, tsk tsk now we see that they have the control over the Central Server. tsk tsk" and "Ito po ay isang hayagang nandaya ang kampong dilaw. I am really disappointed. — with Richard Ferdinand De Roxas...". The post has 16 likes and 6 comments. One comment from John Ruscel says "Typo error daw! GMA truningin me." and another from Hance Reyes says "The GMA News Social Media graphic of the 5:30 AM VP count had a typographical error. Sen, Chiz Escudero's count".

Here below is another screen shot I got from FB. I don't know if it has any connection to the picture above, but it obviously alludes to cheating. There was no further explanation that I could follow up on.

## Dagdag Bawas 3.0: 2 professors from prestigious schools believe Marcos is a victim of election...

Two interesting theories have been floating around in the social media claiming that Bongbong Marcos is a victim of "Dagdag Bawas 3.0!"

PINOYTRENDINGNEWS.NET

I find it tiring and a waste of time to read FB postings, especially on politics. Many of them are rants. But sometimes, there are amusing postings. The picture inset below comes from some nerd whose posting I reproduce on the next 1-1/2 pages. Couldn't even get his name.

I must state that I am not for BBM, but am just reporting what I see about the cheating controversy.

Danny Gil, 19 May 2016

### President

### Vice President

## **How did COMELEak achieve the magic trick? Here's how! #Election2016**

They launched a code inside COMELEAK CENTRAL triggered approximately around 10:00PM or earlier on May 9, 2016 whose instructions are to SWAP THE VOTING CHANNELS between ROXAS and POE and between BBM and ROBREDO.

### **WHAT IS THE EFFECT YOU ASK?**

All succeeding votes of Poe will go to Roxas and vice versa. Then all succeeding votes of BBM will go to Robredo and vice versa. That is the reason why Poe and Roxas' numbers got swapped around 10:10PM since they are so close with a 1% margin of difference and Roxas keeps climbing in percentages in a very unnatural way.

On the other hand it took until 4:40AM in the morning for Robredo to finally catch up with BBM even with the manipulated numbers (their votes got SWAPPED at this point in time) because she is far behind in percentages, but it is very clear in the graphs that she climbed too fast starting @ the exact same time that Roxas did then plateaued until it reached a singularity.

When you manipulate data this way, a SINGULARITY happens which means that the numbers CONVERGE at a certain point in time to EQUALIZE THE EFFECT OF THE NEW CODE that is run by the VCM resulting in AN INFLUX OF VOTES IN ONE and a DRASTIC REDUCTION IN THE OTHER a.k.a. DIGITAL DAGDAG BAWAS, then proceeds to maintain the new trend after the singularity. If the cheating wasn't done on the VCM clients, it was done on the server, it's either one or a combination of the two.

NOTE: In a CLEAN election, the vote PERCENTAGES SHOULD HAVE VERY SMALL or NEGLIGIBLE DEVIATIONS starting from as little as 5% of total votes submitted onwards (that is 2.1 Million votes and is 546 times more in volume than SWS/PULSE ASIA SURVEY sampling) which means that at 5% of votes submitted, we can already see and forecast the winner because these numbers is an AGGREGATE FROM THE MEAN AVERAGES FROM RANDOM CLUSTERS NATIONWIDE which means THEY ARE AN ACCURATE REPRESENTATION OF THE WHOLE.

BEFORE THIS, EVERYONE IN THE PRES and VP RACE MAINTAINED THEIR PERCENTAGES FOR 4 LONG HOURS FROM 6:00PM-10:00PM THEN THIS STATISTICAL ABBERATION HAPPENED in a JUST A MATTER OF MINUTES!

ENTER THE MODUS OPERANDI - CHANGE THE CODE IN THE SERVER and EVERYTHING GOES HAYWIRE! PERCENTAGES CLIMB/DROP IN ARTIFICIAL FASHION and SINGULARITIES HAPPEN! THIS IS A CLEAR RED FLAG FOR STATISTICIANS THAT SOMETHING IS VERY WRONG.

### **HOW DO I KNOW THIS?**

I'm a programmer and statistician, I graduated in AMA and I know how these things (VCMs) can be made to process data in a certain way with just a simple change in code or instruction in the server.

SHOULD YOU BE WORRIED?

That is for you to decide. If you are a concerned citizen, please share and tag your friends. I DID NOT VOTE FOR BBM, but I just want the truth to prevail. In the current state of things, BBM HAS VIRTUALLY ZERO CHANCE TO WIN A RACE RIGGED AGAINST HIM.

#RecountVP is in order.

REMEMBER, IT IS OUR RIGHT TO HAVE A CLEAN AND HONEST ELECTIONS.

P.S.

I challenge COMELEAK to FILE A CASE AGAINST ME IF YOU CAN PROVE MY THEORY WRONG! GROW A SPINE, GET OUT OF YOUR HIDING PLACES YOU YELLOW BASTARDS AND GIVE US WHAT WE WANT! A VP/Senatorial RECOUNT - IN MANUAL MODE!

THIS IS VOX POPULI, VOX DEI God damn it.

What amuses me even more are some of the rejoinders of my friends, after my earlier posts on politics, especially my preference for Duterte and my objection to Roxas and especially Penoy, which I posted early on.

I still find this VP race most relevant because Duterte is old and anything can happen to him, and here I am very ambivalent. If BBM becomes VP, he is one step closer to bringing back the Marcos legacy. On the other hand, Robredo may bring back the Penoy legacy. Hopefully not, though.

One pro-Duterte friend thought I had a very fertile mind about this succession. Another thought Duterte should shoot Penoy at the Luneta. Still another was all praises for Penoy as the best president, and yet another early on, said he was a genius. Another admonished that either VP might assassinate Duterte to accelerate the process.

I laugh at all of these as amusing and titillating opinions that certainly should not be taken as inflammatory. Among friends, we can agree to disagree pleasantly. (On the other extreme, I have a friend who often posts his exchanges with his cyber groups, many of whom are avowed enemies, and they insult each other like anything. Most entertaining and informative, too).

So allow me to add on a few more rant snippets from FB, and take it from there. I could add more but that would be information overload. You can then see where I am coming from.

Danny Gil

I received this message today -

The leaders of LP led by Sec ABAD held meeting at the Club Filipino in Green Hill yesterday noon. They conceded Roxas has no chance of beating Duterte in the presl election. Duterte who enjoys comfortable lead over Poe who is second to him is obviously very hard in COMELEC to cheat and proclaim ROXAS elected president. Instead, they admitted Duterte will really win. But in VP race they adopted a Plan A, B and C using COMELEC smartmatic technology to cheat Marcos votes and proclaim Robredo the VP winner. After 6 months, the LP elected congressmen and senators who are majority in the house and senate, will impeach Duterte and Robredo will assume as president.. This is the plan of NONOY AQUINO. PIs ikalat ninyo itong demonyong plano ni AQUINO.

We hardly saw new Infrastructure Projects in his six years as president. The Philippines is very very rich but how come no new infrastructure can be seen in 98% of the country's archipelago ?????

Infrastructure projects under the BS Regime are all but non-existent, despite all the billions coming in. Whatever highway he inaugurated , it was from the previous administration.

Where is it???

# PALACE SAYS UNAWARE OF NOY GOVT'S P1.3-T CONCEALED DEBTS

Written by **Joshua L. Labonera** | Tuesday, 09 June 2015 00:00 | font size  | Print | 25 comments

Malacañang has expressed ignorance on the findings of the Commission on Audit (CoA) that the government "violated" two provisions in the Constitution for failing to reveal around P1.3-billion contingent liabilities, or potential state obligations, incurred by the state as of December 2013.

Presidential spokesman Edwin Lacierda, at a Palace briefing, yesterday said he has not been informed on the matter, but stressed the Aquino administration will answer the transparency accusation once asked by the constitutional body.

"I haven't read the CoA report if there is (any). Are they referring to a specific agency? Let me just verify, but I wouldn't have any information right now on the CoA report. Certainly, if we are asked we would be able to respond too," he stressed.

According to state auditors, the Aquino administration's non-disclosure of said contingent liabilities is contrary to the transparency policy embodied in Section 7, Article III, of the

The National Food Authority along with three other agencies were transferred to the Office of the President from the Agriculture department on May 5, 2014 via EO No. 165. **File photo**

DAVAO CITY, Philippines — Incoming Agriculture Secretary Emmanuel Piñol will push for the rescinding of President Aquino's executive order (EO) that transferred the National Food Authority (NFA) and three other agencies to the Office of the President from the Agriculture department.

Piñol said the supervision of the NFA, the National Irrigation Administration (NIA), the Philippine Coconut Authority (PCA) and the Fertilizer, and Pesticide Authority (FPA) should be returned to the Agriculture department to ensure well-coordinated policies.

"I will recommend to the president that the executive order issued by President Benigno Aquino III which separated NFA, PCA and NIA (from the Agriculture department) be rescinded," Piñol said in an interview Tuesday here.

"You can't possibly function effectively if the operations are compartmentalized," he added.

Piñol said lack of coordination could lead to unnecessary spending and corruption.
