Guild, 1961-62
1st Vice-President, Circulo Cervantino,
1st semester, 1962-63
Features Editor, The Action
Member: International Club

Aurora Abrera-Campbell, nicknamed "Rory," has devoted her entire life to education and teaching. She retired in 2020 after having spent 55 years teaching in the Philippines, the United States, and Venezuela. She has taught at all grade levels, starting from pre-school to college. She majored in English at UP and attended the University of Pittsburgh and New York University (with a semester at Oxford University) for her master's degrees in English and Elementary Education. In 1977 she created The International Pre-School Center in New York State that eventually blossomed into three large centers in different cities in Westchester and Dutchess County, New York. In 2007, she sold her daycare business to a Swiss couple who shared the same pre-school philosophy. Rory moved to Texas and helped establish two church-related Early Childhood centers in Dallas and Colleyville where she also became their Director. In 2001, Rory decided to resume teaching at the college level, which had been her first job at the University of Pittsburgh. In Texas, she joined Tarrant County College as a professor of English Literature, Grammar and Composition and remained there until her retirement in 2020. Rory also had a love for media and indulged in her favorite hobby for 15 years, producing and hosting a television show in Westchester and Rockland Counties in New York State. The show, *Peekskill Profiles*, enjoyed a viewership of 150,000 and aired from 1982-1997. Rory interviewed outstanding talents living in the area that included the twentieth century's most outstanding composer, Maestro Aaron Copland, and Life Magazine Editor, Ed Thompson. Through her work and hobbies, Rory has won many awards including listings in different Who's Whos - the East, in American Education, in America, in American Women, in Women, in the World - and recognized in the compilation entitled *Two Thousand Notable Women*. During her media work, Continental Television and Hudson Valley Cablesystems recognized her for Distinguished Achievement and Excellence in Programming. Westchester County Executive Andrew O'Rourke honored her for "service rendered to Westchester County." In 2015, Tarrant County College presented her with the Outstanding Adjunct Faculty Award in the Humanities. She was crowned "Miss International" in 1964 at the International Harvest Festival in Pittsburgh attended by students of the University of Pittsburgh, Chatham College, Carnegie Tech, and Duquesne University. She now lives in Southlake, Texas, with her husband, Jim. Their children, Joseph Aaron and Sandra, live in Arizona and Texas. Jim and Rory have two memorial scholarship foundations that honor son Marc, awarding several annual scholarships to deserving high school graduates entering college. Today, Rory volunteers in charitable organizations, enjoys gardening and taking care of her dog, Bailey, and her two cats, Bonito and Sweetie.

RECENT PICTURE

After graduating in 1964 with an AB English degree, I took graduate classes in anthropology at Ateneo de Manila graduate school. Much later, I graduated with a Master's degree in International Public Policy from the School of Advanced International Studies of Johns Hopkins University.

Taught undergraduate classes in sociology and literature at St. Theresa's College, QC. Traveled to the US on behalf of a communications development project in Infanta, Quezon where I had previously conducted social research. Worked with a pilot project to computerize botanical systems at the Museum of Natural History of the Smithsonian Institution in Washington DC. Later worked at the US regional office in the Americas of the World Health Organization where I retired as Assistant Treasurer in 2002.

Married Eugenio Evangelista (Ateneo de Manila and New York University). Raised our two children, Beatrice Marie and Ignatius Rafael, in the Virginia suburbs of Washington DC. Am now a resident of Pittsburgh PA, where I contribute my efforts to help improve lives of autistic individuals as I enjoy the serene surroundings of my garden city community.

BACHELOR OF SCIENCE
IN MECHANICAL ENGINEERING

Writeup by Danny:2014

Tigi's stay in UP spanned a number of years and so he is known by so many. I believe he marched in our 1964 ME class, but was in an earlier Philippinensian.

Tigi worked at PRC, then IBM but mainly ran their huge family farm in Nueva Ecija, until land reform by the Marcos regime made him run more of the family businesses in Manila.

He married former Miss Caltex finalist Elnora Cunanan and they have 5 children.

Tigi is totally retired now, and stays at their grand San Juan residence.

As per Tony Nievera's email, quoted here, "Tigi is happy hosting regular parties at his home, many photos are in my smugmug under Friends or Travel, he loves to sing along with the organist-pianist, the hit of these parties. A few years back he and family passed by Las Vegas and we had a great time shooting the USAF Thunderbirds, my neighbor got us into the Nellis airbase for a special Thunderbirds airshow, we also had the chance to visit the star trek display at the LV Hilton. In 2012, I stayed for 8 months in Manila, and part of Asia, Tigi and us went around to visit Danny Gil in Tanjay, then we went to Bohol, and Cebu, here is a group picture in Negros with the Gil's and Tigi's couple friend."

Johnny's longest work stint was with Shell Oil Company, starting in Tanbangao, Batangas and to other places such as the Laguna Oil Refinery, in various executive positions. This included extended work assignments with family in Australia and Holland. He married Mila Garcia, UP Chemistry. They have two girls, then much later a set of twins, also girls. While in Australia, Mila got her visa approval notice for immigration to the US. but somehow, they didn't avail of it. Years later, when Johnny was in his mid 50's, they finally made the move and settled in NJ, where Mila had family. Johnny worked for a few years as a safety engineer that took him traveling all over the East coast, and then settled at Colgate-Palmolive Company, near their house in Belle Mead, NJ. Mila works in the Pharmaceutical industry.

His elder daughter Maita, with family and 5 children remain in the Philippines. The others, Didit, Celine and Tilde are in NJ.

Johnny says he'll update his writeup after some scheduled medical procedures are completed, which he has indicated to his ChE and Upsca cyber friends.

Write up below 2014

After my stroke 2 years ago that rendered my left side paralyzed, I carried on with physical therapy, doctors, meds, etc. I have personal assistants, a husband wife team to help me. At my daughter beach property starting 2/18/21, I started on water sports as an exercise. I call it the water cure.

Worked in Philippines at Procter & Gamble, Reyes & Lim, USI-Koppel, AG&P, RN Ferrer, Bell Bryant in various capacities in engineering, supervision and management; in diverse fields such as manufacturing, service management, marine engineering, food processing, A&E design. Did work assignments in Asia. Immigrated to the US (CA) in 1982, almost at the age of 40. Worked in a number of A&Es (5), aerospace (Teledyne), CA State government. For about 3 years, ran my own consultancy after getting PE license in CA, then MD, FL, AZ & NY. Did some family business. Moved to NY/NJ in 2001 and got to be chief eng'r at ETC, a minority A&E, and worked on projects with MTA, NJ & NY Schools, etc. All this moving around since 1964 was in line with my two favorite quotes which I combined as "a rolling stone may gather no moss, but a roving bee gathers honey". In 2006, took early retirement at age 63 and moved back to the Philippines to a provincial area of Tanjay, Neg Oriental. Married to Lisa Seferis, UP Pharmacy. We have 3 children in the US, all married, and 5 grandchildren, whom we visit at least yearly. The two elder ones, Ramon and Babette are in NY and NJ and the youngest Joey is in CA. Lisa and I do leisure farming in Tanjay, where on her family property, the

tenants raise cows, goats, pigs, fowl, vegetables and fruit, all organic. Nothing commercial. I spend time internet surfing, blog writing, reading, tinkering, but mostly maintain a genealogical database of many family trees. Link is below. Also ties in to blog writings on farm, travel & trivia. Click on Home.

LIFE HISTORY

Fredie Santiano, ME 1963

fredie santiano

In 1964

in 1987

Wrire up by Danny 2014

Fredie's first job was at Procter & Gample PMC where he was in the maintenance department. He left after a few years and worked for Feati Industries where he was chief engineer. After that stint, he joined the UP Institute of Small Scale Business, which was supported by the Dutch government.

He was sent to Holland a number tines, including trips to the US where he was our guest in LA. He met his future wife at the UP Institute, Maya Aroyo. They have three boys. With all his expertise and entrepranuership, he joined the Araneta Group and was developing some special manufacturing process on his own when he was fatally struck by a heart attack in 1993.

Further corrected by Ed Magtoto:

I might as well share with you my recollection of Fredie's curriculum vitae. It was after his stint with you at Procter and Gamble PMC that Fredie joined the UP Institute of Small Scale Industries. From UPISSI, he worked as Regional Engineer for The Coca-Cola Export Corporation. He subsequently joined government to manage the National Development Company's plants that were processing copra into coconut oil. From government, he managed to profitability the Araneta controled FEATI Industries. Fredie the entrepreneur, decided to strike it out on his own and organized and operated a company manufacturing a low-cost construction material called "woodwool cement board". Unfortunately, his unexpected heart attack ended many more entrepreneurial plans that he had been working on.

No, Freddie was not in our 1962 yearbook. I believe he was in the 1963 Philippinensian.

Nel Reformina, Eng'g, 1965

Cornelio B. Reformina Jr.
Nanuet, New York, USA

Academic highlights:

- 1975 – MBA, University of the Philippines
- 1966 – BSChE, University of the Philippines
- 1965 – Chairman, UPSCA Engineering Chapter
- 1960-66 – Full Scholar at UP by Foundation for Gifted Children
- 1964/65 – Rockefeller Scholar at International Christian University, Tokyo, Japan.
- 1964 – President, UP Chemical Engineering Society (UP Kem Engineers)
- 1963 – Chairman, UPSCA Mass Servers Committee
- 1960 – Valedictorian, Villamor High School, Sta. Ana, Manila
- 1959 – Editor-in-chief, Villamor High School "The Molave"
- 1958 – President, Villamor High School student government

Job highlights:

- 1998-2014 – Department manager at A.Zerega's and Sons, Inc., New Jersey, USA
- 1994-1998 – QA manager at Seviroli Foods, Inc, Long Island, New York, USA
- 1990-1994 – Supervisor/department head at Ronzoni Foods Corporation, New York City
- 1987-1990 – Supervisor at Tuscan Dairy, New York City
- 1987 – migrated to USA
- 1984-1987 – General Production manager then national Warehouse/Distribution manager, Colgate-Palmolive Philippines
- 1979-1984 – SVP/General Manager, Sherwin-Williams, Philippines
- 1976-1979 – Plant manager, Interasia Container Industries, Bataan Export Processing Zone
- 1966-1976 – Supervisor to Soap Plant Manager, Philippine Refining Company Unilever
- 1966 – First semester only, Instructor, UP College of Engineering

Others:

- 2009 to present: President, Emilia Foundation, Inc, education advocacy non-profit organization registered in Illinois USA with main work in the Philippines, started with schools in Malinao, Albay.
- 1981 – President, Philippine Association of Paint Manufacturers (PAPM).

Write up by self 2014

A few days, before formal graduation in 1962, I joined Procter and Gamble PMC as Cost Control Engineer trainee. In September 1962. I left Manila for the University of Maryland at College Park to pursue graduate studies in Chemical Engineering on an assistantship offered by the university. Graduated with M.S. and Ph. D. In Chemical Engineering in 1964 and 1966, respectively.

In early 1966, Joined Corporate Research and Development of The Babcock & Wilcox Company at Alliance, Ohio. Worked on process equipment for pollution control. Moved to the Central Pacific Regional Office of The Coca-Cola Export Corporation in Manila in June 1967. In the next twenty one years, held various management and technical positions for Coca-Cola, working closely with bottlers, canners, suppliers, and regulatory agencies in the countries involved.

In 1989, I was appointed by Pres. Corazon Aquino as Undersecretary, Department of Science and Technology. A few days to the end of the term of office of Pres. Aquino, I left government service to provide consulting work to San Miguel Corporation. Additional consulting activities to international organizations followed. Assistance to small business as Trustee of both the Entrepinoy Volunteers Foundation (EVFI) and Small Enterprises Research and Development Foundation (SERDEF)

Married in 1969 to Josie Tan of the Advertising sector, with two daughters and a son. All pursuing their own respective careers.

Editor, *Fire and Ice* (1960-1962)
Member: Kem Engineers
UP Engineering Fraulein

Writeup by self:

Mercy started professional life as a technical researcher in the Metallurgical Advisory Group of the defunct Philippine Implementation Agency during President Diosdado Macapagal's administration; this Group was tasked to oversee the development of the metals industry, particularly, the realization of the country's first steel manufacturing company. Then Mercy moved on to Procter and Gamble as Project Manager in its Market Research Department where she learned the ABC's of market research. She helped set up and manage two major research companies in the Philippines: CONSUMER PULSE, which was eventually bought by AC NIELSEN, and TRENDS, which eventually became TNS (Taylor Nelson Sofres). TRENDS started as an all-woman, all-Filipino market research outfit whose clientele belonged to the top 50 companies of the Philippines. Mercy is also one of the founders of Social Weather Stations and Pulse Asia, the country's two top polling agencies. After 42 years of research practice, Mercy retired in December 2007 as Managing Director of TNS Philippines.

She is married to Gémino ("Jimmy") Abad, University Professor emeritus in UP and poet, with whom she has five children, one of whom has gone ahead to heaven. Her major pre-occupation these days are her three grand children. Active in NGO work, she is currently President of Ahon sa Hirap or ASHI (social development with microfinance); trustee of Kaisahang Buhay Foundation (adoption), Jesuit Communication (social communication), Family Rosary Crusade (promoting prayer), and AKKAPKA (non-violence).

Write up above 2014

RECENT PICTURE

GEMINO H. ABAD
Bachelor of Arts
Magna Cum laude

Gémino H. Abad, University Professor emeritus of literature and creative writing at the University of the Philippines (U.P.), is a poet, fictionist, and literary critic and historian, with various honors and awards. In 2009, he received Italy's Premio Feronia ("Foreign author category") for his poetry translated into Italian by Gëzim Hajdari and Andrea Gazzoni (later published as a bilingual edn., *Dove le parole non si spezzano / Where No Words Break* (Roma: Edizioni Ensemble, 2015). When Bridges Are Down, Mountains Too Far (2020) is his eleventh poetry collection, and Past Mountain Dreaming (2010), his ninth collection of critical essays; he has two collections of short stories, Orion's Belt (1996) and A Makeshift Sun (2001). (A selection of his own poems since 1973, *The Light in One's Blood*, has still been delayed by the pandemic since March 2020.) He is known also for his three-volume historical anthology of Filipino poetry in English from 1905 to the 1990s – *Man of Earth* (co-ed., Edna Zapanta Manlapaz; 1989) and, as sole editor, *A Native editor - A Native Clearing* (1993), *A Habit of Shores* (1999), and its sequel, *The Achieve of, the Mastery* (co-ed., Mookie Katigbak-Lacuesta; 2018); and a six-volume historical anthology of Filipino short stories in English from 1956 to 2008 – *Upon Our Own Ground* (2008); *Underground Spirit* (2010); and *Hoard of Thunder* (2012). He obtained his Ph.D. in English at the University of Chicago in 1970, and continues to teach at

U.P. where he has served as Secretary of the University, Vice-President for Academic Affairs, and Director of the U.P. Creative Writing Center (now an Institute). President for Academic Affairs, and Director of the U.P. Creative Writing Center (now an Institute).

(1961-1962)
Co-Managing Editor, UP Engineer
(1961-1962)
Public Relations Officer, Engineering
Association Council (1961)
Member: Kem Engineers

Writeup by self:

After my high school at La Salle I enrolled at Ateneo for an AB degree, then proceeded to UP.

Following my chemical engineering degree from UP in 1962 I continued my studies leading to master's degree in chemical engineering at the Imperial Col-

lege of Science and Technology of the University of London.

Upon returning to Manila in 1965, I was employed by Shell Philippines. During my 18 years there, I first worked for 3 years at the Shell Refinery in Tabangao, Batangas. My main responsibility was to blend refined components into products for the export and Philippine market. Then I was assigned to the supply planning & trading department in Manila where I focused on optimising the Tabangao refinery crude oil intakes to match the product demands of the local marketing group.

In the mid 70's I briefly taught quantitative analysis at UP Manila

After availing of an early retirement package, I was offered a job in the corporate planning department of Kuwait National Petroleum Company. Using linear programming techniques, my primary function was to optimise the crude oil intakes and the resulting product mix of three large refineries to cater to both local and export demands. Refinery intakes totalled about 1 million barrels per day of Kuwait crude.

My employment was on a family category, so my wife Lenore and three children joined me in Kuwait. The kids studied at the American School of Kuwait. Unfortunately, Kuwait was invaded by Iraq in 1990. Luckily we were all home in Manila on my annual leave and were spared of the war ordeals.

In 1991 after the war I returned to Kuwait and resumed my work with Kuwait National Petroleum Co until 1995. My family stayed in Manila where my kids had already enrolled in local schools.

Back home, I set up a home-based entrepreneurship producing and marketing specialty soaps and perfumes for about two years. Since then, I have retired and now spend a lot of time on the computer and occasionally in target shooting with my air guns.

Tony worked in the Philippines longest at IBM. He married Josie Angeles, UP Education. They have 3 children, the twin boys Michael and Angelo, and the girl Lisa. Sometime in the early 1980's, they immigrated to Australia, where Tony worked also at IBM. But the lure of the US was great, especially since Josie had family there, and sometime in the mid 1990's, they immigrated to Los Angeles, CA. Tony worked as an independent software and system contractor until his recent retirement in 2012. Josie continues teaching at the LA school district. They travel often, especially to Australia where their son Angelo moved back to a few years ago.

Email from Tony:

Thanks for your effort to collect all the info. I'm satisfied with the writeup you have done. Unfortunately the week of the reunion I'll be in NY. Maybe next time.

Started work in 1965, first with GE Appliances Factory. Then suddenly in 1966, with recommendations from UP Engineering, I was recruited by a mechanical contractor from Seattle, WA for the purpose of training and taking over their Makati Office... This led to a permanent residency and continued on to bid, visit and manage won projects from the Navy with locations in the State of Alaska and also assisted in Hawaiian, Guam and Philippine projects. In 1969, joined Bechtel in San Francisco and quickly sent to a nuclear plant construction at Delta PA. Moved on after 6 months to

New York for WEDCO and moved steam supplier that started in 1974 and continued on for 10 years with projects ranging from \$4 Billion to \$15 Billion. Projects were 3 in Arizona, 3 in Korea, 3 in Taiwan, 1 in Bilbao, Spain at the Basque nation a week prior to the assassination of their project manager, 2 in Guang Dong, China, Georgia and Texas. Most complicated one was the take over project at Texas, managed 3 teams that included assessing completed work at the field, work in progress and work to complete that ended up as a lump sum capital project. Completed training in nuclear plant operations to further knowledge in these plants. We also spent 6 months in Mexico City training CFE engineers and Finance department in the methodology to a nuclear plant supplier that included capital budgets and economic analysis. I was also who were trying to start a nuclear plant. I also was an expert witness for Taiwan Nuclear with the EXIM Bank in Washington DC. My work entailed working with and managing several teams, attending and presenting at executive meetings and board meetings and performing risk assessments. There were also several other stints in the Philippines assisting NPC with economic and feasibility studies, one just at the start of the Camp Crame incident. When the nuclear industry slowed, I was sent to Vienna, Austria to in 1986 just prior to the earthquake. Most of the projects there were for cogeneration plants and government projects to decommission and dismantle nuclear facilities and others. In 1986, I was assigned to the Makati office, Philippines and finished after 4 years as the country manager. Then the move to Las Vegas as the management team of the Test Site. Then retired in 2006 after 37 years with Bechtel. Before and during retirement, Muni, my wife had stints consulting for a Gold Coast, Australian Development firm so we had extended stays at the Gold Coast, and visited for our grand trip to China from Beijing, the Great Wall, Shanghai, Xian, Guang Dong, Macau and Hong Kong. Also visited Japan, Singapore and Indonesia. We have done extensive travels in Europe such as Venice, San Marco, Florence, Tuscany, Rome, Prague, Portugal, Spain, UK and St Andrews. We enjoy visiting the families of the 4 kids and 13 grand kids in the East Coast and San Francisco. We had long stays at Blomington IN, Toronto, NYC, Wisconsin, Boston and San Francisco. The current pandemic has slowed us down but we intend to continue with our visits to them in the near future. Our family below.

I joined Procter and Gamble MC, detergents department, as college recruit two weeks before the UP graduation rites in 1965. At P&G PMC, I worked with many P alumni - Freddie Santiano, Manny Gil, Art Cuenco, Odia De Guzman, and others. I also met my lovely wife, Bernadette Jaramillo, who was then with the product development department while completing her studies at UP Padre Faura. In search of the new thing called computers; in 1968 I moved to IBM Philippines, holding several sales and management positions, rising to division country manager when I took a golden handshake in 1984 and moved to become the General Manager of Unisys Philippines.

While at IBM I completed

In 1987, I ventured on my own and established a communications company, Stratcom, installing thousands of voice and data over radio systems around the country. In 1990, afraid of the destabilizing effect of the many unsuccessful coup de tats, I established a base in the bay area in California but returned quickly to Manila to start a computer disaster recovery center, EEMC Philippines. In late 1996 I decided to retire and immigrate to the USA. After playing golf for a year, I got tired of retired life and I joined Computer Associates in Long Island NY, as Assistant Vice President for world-wide customer support and Y2K and Euro compliance officer. After ensuring that my Y2K projects were successful, I rejoined IBM in January 2000, at the headquarters of Systems Technology Group for the relaunch of the mainframe. After ten years of varied corporate marketing communications lead positions, I finally retired in 2010.

Bernie and I have 5 children, all married, and have 12 grandchildren. The eldest son, is a PhD in Biological Sciences, in St Louis - his eldest daughter graduated from UC Berkeley, a daughter is graduating in June from UCLA and a son is graduating next year from Cornell; the second child, has her Marketing Communications/PR/DigitalMarketing companies in Makati - she has 3 children; the third child, is a pediatrician and with his wife, also an MD, have their clinic in Texas - their eldest son is graduating next year from Univ of Texas, with daughter and son in high and grade schools; the fourth child, an MD daughter and her MD husband, have their medical center in Henderson - she has a 13 yr old son; the youngest son, is a store manager for Target

I am now based in Las Vegas, where I spend many hours: shooting with my cameras, and firearms, stargazing with my telescopes, painting in water color and oil, smelling the fragrant giant roses, enjoying my beer and wine in the hot tub, that is, if I am not traveling with my wife.

OSCAR P. PALABYAB A.B. POL SCI '68 (UPCAS) LLB '72 (UPCL)

I finished my A. B. Political Science degree in 1968 at the U.P. College of Arts and Sciences and finished my law course at the U.P. College of Law in 1972. I joined UPSCA in 1965 and became its president in 1969 then reelected for another term in 1970. With the protest fever engulfing the University, the main menu of which was the anti-Marcos movement and was the common denominator of the different student groups of varying ideological colors. In the years prior, UPSCA was mostly involved in campus politics as part of its apostolate. We continued this tradition and continued to actively field candidates for both college and the University Council. I was elected Vice Chairman of the UPSC in 1971.

My first job was with National Grains Authority in 1973. In early 1974 I joined Pefianco & Associates, and was assigned to the head office in Tokyo in Mitsubishi's Lumber Department where I worked from 1974 until 1980. Subsequently, I was sent on assignment to Jakarta, Indonesia for Mitsubishi's projects from 1980 to 1982. In 1986 we formed the law firm of Cruz Palabyab Llorin in Associates with offices in Legaspi Village, Makati in 1986. I was appointed in 2001 as Undersecretary of the Department of Tourism up to 2010. From 2016 to 2018 I served as the Secretary General of the Philippine Red Cross.

I am married to Rita Imelda Bulatao with two children, namely Victor Rodolfo, now married to Ms. Isabel de la Cruz, and Aaron Rufino, single.

I am retired from active law practice but still do consultancies, the latest of which is, as a Consultant to the Committee on Tourism of the House of Representatives.

After Graduation, my first job was as a research assistant in U.P. with a research grant to do research on the anti-malarial properties of certain medicinal plants. After completing my contract, I joined Shell Oil Philippines as a Sales Representative for Consumer Accounts. This proved to be a milestone decision, for I met my wife-to-be there. She was Lourdes C. Del Prado, a cum laude graduate of Assumption College. While working for Shell, I heard about the joint venture between Ateneo, LaSalle and The Harvard Business School who had established a Graduate Business School – The Asian Institute of Management. I then entered the full time MBA program In 1969, to later become one of the graduating Class of '71. Sometime during my graduate school years, I also got married and Lourdes Del Prado became Mrs. Deng Juliano.

ABS-CBN recruited me upon graduation as Staff Assistant to the General Manager, and after a year of completing several projects, I was assigned as Finance Director of Philippine Telephone and Telegraph, one of its subsidiaries. Then disaster struck! Martial Law was declared and the ABS-CBN companies were acquired by the Benedicto group. Our entire management team resigned and decided to set up our own businesses. The years that followed were the darkest years of my life, and I had a newly born child as well. Doing ethical business was tough during those years. As business became more difficult, I moved to and from several jobs before finally getting recruited by GE Philippines in 1981

I joined the company as VP for Strategic Planning and Business development. The 80's proved to be a very difficult time for the economy and my time was spent more in business divestments rather than acquisitions. In my capacity I was also in the Board of Philippine Electric Manufacturing Corp (PEMCO), Philcor Credit Corporation, and GE Philippines.

Sometime in 1987 I was reassigned to Singapore to undertake business development efforts in the region; leading to assignments in Indonesia, Malaysia, Vietnam, and even China. The work was exciting and challenging. In 1995 I was then given the post of Country manager – Oceania Region under the GE Medical Systems Operation. This was the post I held until my retirement around the turn of the millennium. In 2008, Deng, my wife was diagnosed with lung cancer and despite a 4 year struggle, passed away in 2011. It was a life changing event. My kids were all happily married with families and households of their own, so I decided to downsize and move on. I sold our house and other assets, and transitioned to condo living where I am now living and content with my lot.

Deng and I have three children; the eldest is my daughter, Mara Giselle, a BA Liberal Arts and Commerce graduate of LaSalle, a Housewife, Interior Designer, a member of the Board of her Homeowners Association, VP of an NGO, and married with two daughters. Eduardo Miguel, my eldest son, was - Consultant Watson Wyatt, now Senior VP of CitiBank Philippines, and Married with one son. My youngest is Franco Diego, was - AVP Credit Suisse Singapore, now VP JP Morgan Philippines, Married, with two daughters

Philippinensian Data

Georgina Reyes Encanto graduated with an AB English and Comparative Literature (Magna cum Laude) from the University of the Philippines in 1967. She earned her MA in English and American Literature from Brandeis University in Massachusetts as a Fulbright Travel Grantee and Wien Scholar in 1970. She obtained her Ph.D in Philippine Studies from the University of the Philippines in 1996.

She taught English subjects in Ateneo from 1973 to 1975 and returned to UP where she worked as Acting Director of the UP Information Office from 1984-85. In 1985, she was appointed Dean of the then Institute of Mass Communication at the age of 39. During her term, the Institute was elevated to a college. She initiated a workshop for community journalists which has trained hundreds of community journalists, revived the Philippines Communication Journal and transferred DZUP from the College of Arts and Letters to the CMC.

Georgina taught for 34 years.

She has published three books— From the *Traje de Mestiza to the Terno* which she co- authored with Salvador Bernal in 1992; *Constructing the Filipina: A History of Women’s Magazines from 1891 to 2004* (2004) and *The Community Press and its Revolutionary Tradition* (2019).

She was appointed Regent of the University of the Philippines from April 2015 to September 2016.

In 2019 she was named one of 16 Outstanding Citizens of Quezon City.

Georgina was married to Mervyn Encanto, a corporate lawyer connected with the United Coconut Planters Bank and Philippine National Bank. A student leader who ran under the UPSCA slate (CAVE) in 1965, he became National President of the Integrated Bar of the Philippines and President of Lawasia. He passed away in 2007.

They have three children: Melissa, head of the PR for Gov’t Relations of the Infrastructure Subsidiary of San Miguel Corporation married to another lawyer Basco Tagarda; Katrina and her husband EJ I Galang are both creative directors in Lowe UK, and Margarita Angela Jauregui, a marketing manager who now works for The Meatless Farm and lives with her husband Miguel Jauregui who works for ING, in Singapore.

Georgina enjoys retirement in La Vista with her three grandchildren Miguel, Diego and Andie and looks forward to traveling again to London to visit Hugo. She serves on the LV Board and edits the La Vista Newsletter.

LIFE HISTORY

After graduation in March, 1963, I prepared to take the Board Exams in August. Then I left for the USA after taking the board exams. I had been accepted as a graduate student at MIT, Dept of Food Science, and I was able to get a research assistantship. (I had to take a number of undergraduate disciplines like biochemistry and microbiology which I did not have as an engineering student. They were very interesting especially since the professors were really impressive. I remember the first time I walked along the long grey corridors of MIT, I was impressed by the names on the doors of the various offices - they were mostly names of the books I had been using before. I thought to myself - those people really existed! And to attend seminars given by authors of the various papers we studied and discussed during our seminar classes back home - I was just very impressed. I had to study hard, especially for the undergraduate subjects, but the library was open 24 hours a day, 7 days a week, so that was a great help. And we could work in the labs all day and all night long.)

After getting my MS degree in Food Microbiology in 1965, I prepared to return to the Philippines, but my professor offered me to continue for a Ph.D. I thought I did not have the necessary preparations for food microbiology and there was an opening in Food Chemistry, so I opted for that. (When I was preparing for the written and oral exams for the doctorate program.) I met Dietrich who had arrived from Brazil on a scholarship; he was in Food Engineering and was there for a masters program. We got to know and like each other. After his MS degree, he returned to Campinas, SP, Brazil, but his professor asked him to return for his doctor's degree. So after a little over a year, he returned and we got married. We both got our doctors degrees from MIT, me in 1970 and Dietrich in 1972 and our first son, Diego, was born in Boston in 1971.

In July, 1972, we returned to Campinas, São Paulo, Br. Dietrich had his post at the Technical Institute in Campinas, (ITAL) and I was hired as a professor at the University of Campinas, Faculty of Food Science and Engineering. I liked teaching, I was quite a demanding professor and at first the students found it quite different, but when they graduated, they came to the conclusion that it was good for them. A number of them worked with Dietrich at the Institute after graduation. Until now we are still friends with a number of former students.

At the end of 1977, Dietrich accepted a job with General Foods in São Paulo, so we had to move and I gave up my post at UNICAMP I taught for a while at the University of São Paulo, USP (and did a number of other small jobs); but what I liked most was doing volunteer jobs at the parish. We lived near a Benedictine Monastery and I became an Oblate of Saint Benedict, and there were just so many things that we could do in the parish like catechism, visiting prisoners, ministering to the sick, activities for the elderly, so after much thinking and deliberating, I asked Dietrich if it was all right for me to just work on the volunteer jobs at the parish. He agreed and that is what I have been doing since 1990. When Dietrich retired in 2003, we decided to move to a place we have in Valinhos, a smaller city about 15 Km from Campinas and 85 KM from SP. Here I continue working with the parish - visiting and ministering the Eucharist to people who are home bound, staying on a listening post in the parish, listening to people who just needed someone to talk to, things like that. But now, with the covid pandemic, we had to stop these activities, especially since I myself am considered one of the high risk people. So instead of actually visiting, I take the phone and just make phone calls - I am not really a fan of talking over the phone, but sometimes we have to do things that are not exactly to our wishes. But in all, I am very grateful for everything God has given me. It has been a good life. I have 2 sons, Diego who was born in Boston and who has decided to live with his Brazilian wife in California now, and Ernesto, who is a university professor in Paraná, Br., together with his wife, Leda, who is also a university professor there, and their 2 lovely daughters, Catarina, 12 years old now, who likes to say that everyone says she takes after her Lola, and Esmeralda, 8 years old, who is growing up each day to be a really nice and lovely child.
